PART 5 - QUESTIONS AND ANSWERS

5.1 Question: Does anyone know the elevation of the sanitary line where the tie-in takes place?

1. Answer: It should be approximately 2'-6" but the contractor should verify this dimension in the field.

5.2 Question: Can you confirm the shelf material for W1-3 and W5? W4 is clearly called out as metal but the other shelving is not noted either

1. W1-3 shelving is plastic laminate clad shelves with metal support brackets. The metal support brackets should match the metal shelving of W4.
